

INSTALLATION & QUICK START GUIDE

Before you begin

Check what's in the box

You should have:

- Mistu unit
- Container (2)
- Shower head
- Shower hose
- Wall mounting hooks
- Velcro fixing pads (9)
- Screws and wall plugs (13)
- Plumbers tape / washers
- Cleaning wipes
- Mounting templates (12)
- Ergonomic Controls (if ordered)

Important: Only use the shower head and hose supplied with Mistu. Using other fittings may damage the unit and may affect your warranty.

Choose the best position

Mistu can be fitted:

- At the same height as your current shower head
- Higher, if easier for standing users
- Lower, if the person showers while seated
- Choose a position that feels safe, comfortable and easy to reach.

Before fixing Mistu, hold it in place and check that:

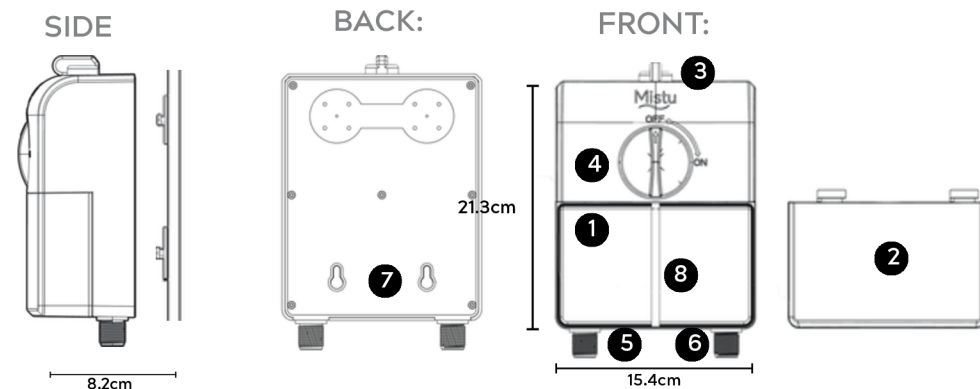

- The controls are easy to reach
- The container can slide out and back in
- The hose can move freely
- The shower head sits comfortably for use

Positioning tip:

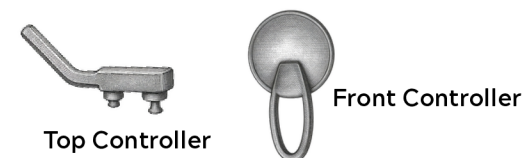

For seated showering, place Mistu lower so the controls and container are easier to reach.

MISTU UNIT

ERGONOMIC CONTROLS (OPTIONAL)

INSTALLATION OPTION 1: NO-DRILL VELCRO FIXING

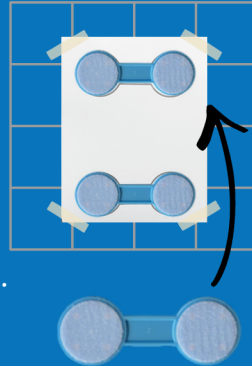

This option is quick, clean and suitable if you do not want to drill into the wall.

You will need

- Cleaning wipe supplied
- Mounting templates
- Velcro fixing pads
- Wall mounting hooks

Step 1: Clean the wall

- Clean the chosen area using the supplied wipe.
- Allow the wall to dry fully before continuing.

Step 2: Position the template

- Tape the positioning template to the wall.
- Check that it is straight before fixing anything in place.

Step 3: Attach the Velcro pads

- Place the Velcro pads into the marked spaces on the template.
- Press each pad firmly so it sticks securely to the wall.

Step 4: Attach the wall hooks

- Attach the wall mounting hooks using template 2 to the velcro pads.
- Make sure the hooks are pointing upwards.

Step 5: Leave overnight

- Allow the adhesive to set overnight before hanging the Mistu unit.

Step 6: Fit the Mistu unit

- Place Mistu onto the wall hooks.
- Slide the unit down gently until it feels secure.
- Check that both sides are properly attached before use.

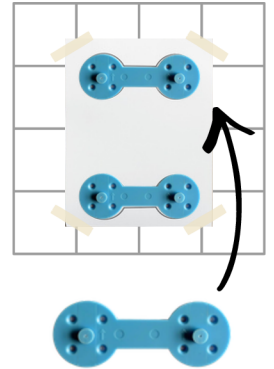

INSTALLATION OPTION 2: SCREW FIXING

This option gives a stronger permanent fixing.

Safety note: Shower walls may contain pipes or wiring. If you are unsure, use a qualified installer.

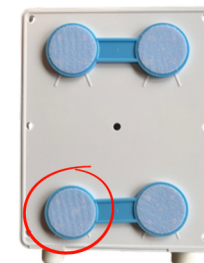

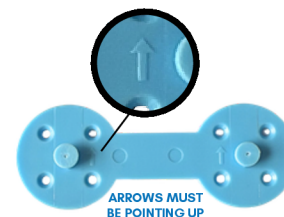

You will need

- Drill
- 6 mm drill bit
- Cross-head screwdriver
- Spirit level or measuring tool
- Screws and wall plugs supplied
- Mounting template

Screw fixing steps

- Clean the installation area and allow it to dry.
- Tape the template to the wall and check it is straight.
- Hold the wall mounting hook in position.
- Make sure the arrows on the hook point upwards.
- Mark the drill holes clearly.
- Drill the holes using a 6 mm drill bit.
- Insert the wall plugs so they sit flush with the wall.
- Secure the wall hook using the screws supplied.
- Place Mistu onto the wall hook.
- Slide the unit down until it locks into position.
- Check that both sides are secure before use.

✓ BOTH SIDES ARE CLICKED INTO TOP POSITION

✗ LEFT SIDE IS NOT CLICKED INTO TOP POSITION.

CONNECTING THE SHOWER HEAD

Step 1: Remove your current shower head

- Unscrew your existing shower head from the shower hose.

Step 2: Connect your existing hose to Mistu

- Screw your existing shower hose into the IN connection on the Mistu unit.

Step 3: Connect the Mistu hose and shower head

- Attach the supplied Mistu shower hose and shower head to the OUT connection.

Step 4: Check for leaks

- Use the supplied washers or plumbers tape to seal the connections.
- Turn the water on gently and check both connections.
- If you see a leak, turn the water off and tighten the connection carefully.

Filling the Mistu Container

If this is difficult to do yourself, ask a carer, friend or family member to help.

Step 1: Remove the container

Slide the container to the left, then down, to remove it from Mistu.

Step 2: Add shower gel or shampoo

- Add 30–50 ml of your usual shower gel or shampoo.
- Add tap water to dilute it.
- You may fill the container fully if you want enough mixture for more than one shower.

Important: Always dilute shower gel or shampoo with water.

Undiluted products may stop Mistu from working correctly.

Step 3: Refit the container

- Guide the small tube back through the filling hole.
- Slide the container up and to the right until it clicks securely into place.

Water pressure

Mistu is designed for water pressure between: 1–4 bar

USING MISTU

Mistu has two main modes:

- Clear water mode
- Infused water mode

Clear water mode

- Turn the front control to ON / RINSE.
- Ensure the Top Controller must be set at OFF (pointing down).
- Only clear water will flow.
- Use this mode before and after using infused water.

Infused water mode

- Turn the front control so it points towards the Mistu logo.
- Ensure the Top Controller must be set at ON (pointing right).
- Diluted shower gel or shampoo will mix into the water.
- Adjusting the product flow
- Use the top control to adjust how much product mixes into the water.
- Turn anti-clockwise for more product flow
- Turn clockwise for less product flow
- Turn fully clockwise to stop product flow
- The product flow may change depending on your water pressure.

After each shower

To keep Mistu working well:

- Turn to clear water mode.
- Run clean water through Mistu and the shower head.
- Remove and rinse the container.
- Leave the container clean for next time.

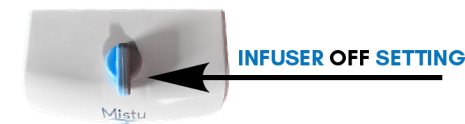

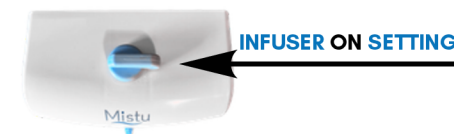

This helps prevent residue build-up and blockages.

SAFETY AND CARE

For safe use:

- Never add anything you are allergic to.
- Do not add acids, alkalis, alcohol, corrosive substances or unfamiliar liquids.
- Always dilute shower gel or shampoo with water.
- Do not place solid residue or sediment into the container.
- Rinse the container after every shower.
- Run clear water through Mistu after use.
- Mistu does not control water temperature. Use your existing shower controls.
